Objective

I am a Software Developer with a strong proficiency in Java programming and a focus on delivering high-quality, efficient software solutions. I excel in problem-solving and collaboration, aiming to create effective applications that meet client needs.

Education

Dr.A.P.J. Technical University, Lucknow, Uttar Pradesh

2018-2022

B.Tech (IT)

CGPA: 7.35/10

Lucknow Public School Madhoganj

2016-2017

Intermediate

89%

Lucknow Public School Madhoganj

2014-2015

High School

89%

Technical Skills

- **Programming Languages:** Java (JDK8, JDK17)
- **Web Development:** HTML, CSS, JavaScript, React.js, Node.js
- **Security:** OAuth, JWT, API key
- **Version Control:** Git
- **Database Integration:** SQL, NoSQL, Java Database configurations
- **Testing:** JUnit (Unit Testing), API testing
- **Performance Optimization:** Benchmarking and optimization
- **Web Services:** HTTP, HTTPS, REST APIs
- **API Design & Documentation:** RESTful API, API Documentation
- **Error Handling:** Proficient in handling errors
- **Collaboration:** Ability to work in a team
- **Concepts:** Data structures, algorithms, Object-Oriented Programming

Additional Skills

- **Problem-Solving Skills:** Strong analytical and problem-solving skills
- **Communication:** Effective communication and teamwork

Experience

CodingNinjas

June 2023 – August 2023

TA Intern

New Delhi

- Key responsibilities included conducting doubt sessions and assisting students in debugging code.
- Assisted students with their assignments and various projects.

Projects

Issue Tracker — Issue Tracking Application

- Allows users to track issues/bugs for different projects.
- Provides a user interface to create projects, view project details, filter issues, and create new issues.
- **Tech Stack:** Node.js, EJS

Google Calendar Clone 📅

- Recreation of the Google Calendar app, excluding components that utilize Google APIs.
- Features local storage for data backup and retrieval using JSON.
- **Tech Stack:** Vanilla JavaScript, HTML, CSS

Hospital API 🏥

- The Hospital API project aims to provide a backend solution for managing hospital-related data.
- It includes features such as user authentication, patient management, appointment scheduling, and more.
- **Tech Stack:** Node.js, Express, MongoDB

Certifications

Coding Ninja Training

Nov 2022 - Present

- **Frontend Dev:** HTML, CSS, JavaScript
- **Backend Dev:** Node.js
- **Java Programming**
- **Data Structures & Algorithms**
